TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, MongoDB, C/C++, HTML/CSS

Frameworks & Tools: Spring Boot, FastAPI, Angular, JUnit, Maven, Docker, Kafka, Git, ELK, AWS, IBM MQ, SVN

Methodologies: Agile, Microservices, CI/CD, Test-Driven Development (TDD)

EXPERIENCE

Technical Analyst

Dec 2024 – Present

AU Small Finance Bank

Jaipur

- Developed Excel-based bulk upload functionality for AD2 partners (e.g., EbixCash, MakeMyTrip), reducing transaction TAT by 80%.
- Collaborated with the OFSS (Oracle) team on MT to MX migration project for SWIFT messages.
- Integrated APIs between customer portals and Core Banking System for New-To-Bank (NTB) customer outward remittance.
- Automated RBI compliance reports, minimizing manual efforts and ensuring timely submission. Cutting manual effort by over 10 hours weekly and improving compliance efficiency.
- Scheduled alert emails for Operations and Business Teams, helping prevent transaction errors proactively.
- Resolved critical production issues in remittance and trade finance modules.
- **Tech Stack:** Java, Spring Boot, SQL, JavaScript, IBM MQ, AWS, MongoDB

Senior Software Engineer

Apr 2021 – Dec 2024

Newgen Software

Noida

- Built a Tracer Service to automate reminders in Bank Guarantee transactions via SWIFT (MT799), improving Bank Guarantee(BG) closure by 80%.
- Developed a unified module for SWIFT message types (MT103, MT202, MT202COV, MT110, MT760, MT767, N-series).
- Integrated third-party bank apps with Newgen Trade Finance Modules using REST APIs, reducing transaction TAT by 60%.
- Created a Trade Memo Module with email-based approvals for AML and high-value transactions—cutting risk by 90% and accelerating approvals by 70%.
- Engineered a Trade Intelligence Module to assess customer risk profiles using transactional history.
- **Tech Stack:** Java, Spring Boot, Spring Batch, Angular, SQL, MongoDB, JavaScript, React, Kafka, IBM MQ

PROJECTS

Facial Recognition-Based Attendance System

Oct 2021 – Dec 2021

- Designed a mobile-based attendance solution with facial recognition and GPS-based location tracking.
- Used DLib for identity verification; integrated with a .NET app for a construction firm(OSS Construction).
- Handled background jobs using Hangfire in the .NET backend.
- **Tech Stack:** Python, FastAPI, .Net, Angular, SQL, Docker, Hangfire, AWS

Early Stage Diabetes Risk Prediction

Mar 2021 – Aug 2021

- Built an ML model to predict early-stage diabetes from common symptoms using classification algorithms.
- **Tech Stack:** Python, Scikit-Learn, TensorFlow, Seaborn, Matplotlib

EDUCATION

Gurukul Kangri University

Haridwar, UK

Bachelor of Technology in Computer Science and Engineering

2017 – 2021

CGPA : 8.34/10

Coursework : OOPs, SQL, DSA, Operating Systems, Computer Networks, Machine Learning, Cloud Computing, UNIX

AWARDS AND CERTIFICATES

- Honored with 3 Pinnacle Performance, 1 Standing Ovation, and 1 Team Performance Awards [View Awards](#)
- Machine Learning and Deep Learning Specialization on Coursera and NPTEL [View Certificates](#)
